Website Posting

Oct 2, 2025

Based on information at the time of required posting, the City experienced no violation of the NPDES Permit conditions (as modified by the March 2021 MAO) for the month of September 2025.

September's DEQ Correspondence is attached below:

The 18th would be great since we may shut down discharge on the 19th for the weekend if water balance is still looking good. We will get grab samples to conduct a split sample testing with DEQ.

Look forward to seeing you on the 18th.

Thank you,

Seth Kelly

Subject: RE: Inspection

Hello Mike,

Our Effluent discharge to the recycled water application is shut down for scheduled maintenance and with the lagoons down low enough (10' and 4.5') we don't plan to resume recycled water application until the 9th. I am also scheduled to be off on the

10th, I would like to be able to be on site for your inspection, but of course Mitch Jaspers our lead operator I am confident can assist in any way needed as well.

As far as sampling goes because we are going to be getting things back into operation on the 9th I don't think it would be the best day to conduct a sampling. Maybe the September 17th would be better? We still do not have a comp sampler at the effluent pump station so any sampling before river discharge would be grab samples collected by my operators every hour they are on shift. So we would get about 10-12 sample grabs for the composite sample.

Hope things are well! Thank you,

Seth Kelly

Subject: Inspection

How does the 10th of September at 9 am sound for an inspection with sampling?

In early 2025, NPDES and WPCF permittees will begin using Your DEQ Online, a one-stop place for you to manage your water quality permit.
