

West Lane Improvements
October 12, 2022

1. Last year with the rain and the mud, chuck holes, and widening the road to get out of bumpy places. It made driving hard, but better than waiting forever for traffic to go by on Hwy 211.
2. I thought when the summer came and school was out, the road would have been paved. But it wasn't! Another school year with heavier traffic.
3. Cars park 3 across to pull out onto Leroy St. They park three deep, cars drive in circles around other cars, pulling out in the middle, or in between cars. It is crazy at times. Traffic from Toliver, and Hwy 211 is getting heavier.
4. Kids are being dropped off across the street, on the other side of West Lane to come to school. We need a Crosswalk from West Lane North to West Lane South, as well as a Crosswalk across West Lane to the School for the Children. They are walking from Fred's Market to go to school. There are no crosswalks for them. They are walking around cars and pickups. There is a large parking lot on the other side of the school, kids could be let out safer.
5. Cars are squirling around while people are trying to park.
6. I counted twenty seven cars going by on 211 before I could pull out the other day, and that was in a slower time. People are taking shortcuts through West Lane to avoid the traffic jam at the tractor place. They are coming from Toliver and taking West Lane to avoid traffic jams. It is being used more and more because of the increased traffic on 211 and on 213. Heinz, and others are seeing more traffic also, but they are marked and paved. South Side of West Lane is Not!
