

NOTICE OF TOWN HALL MEETING

7 p.m. Wednesday, Oct. 19, 2011

Molalla Adult Community Center

315 Kennel Ave., Molalla, OR 97038

This Town Hall Meeting is being held by the Molalla City Council in order to receive public comments, ideas and suggestions regarding a proposed grant application by the City of Molalla to the Oregon Infrastructure Finance Authority to study the feasibility of improving a portion of the South Molalla Forest Road as a new east-west access route to industrially zoned employment lands on the south and west sides of the city.

All of the Forest Road right-of-way in Molalla is owned by the City of Molalla and is currently closed to through traffic. It is identified in the city's 2001 Transportation Systems Plan as a future alternative east-west arterial bypass. The proposed feasibility study would look only at that portion of the Forest Road between Highway 211 and South Molalla Ave. as a way of providing unencumbered future access to the 25-acre Avison industrial site, the 110-acre Floragon site and the Four Corners Industrial Park. An extension of the Forest Road from Ona Way to Highway 213 would also be considered in the study. The grant application may be viewed at www.cityofmolalla.com.
