

Did you know that children in elementary school will be the first generation of Americans with a lower life expectancy than their parents?

The **OSU GROW Healthy Kids and Communities Project** is trying to change these trends in Molalla!

Did you know that **Molalla** has been classified as a **partial food desert** by OSU researchers?

facebook.com/letsmovemolalla

PSU Community health professor, **CARLOS CRESPO**, will share the latest research on **active living and provide evidence based examples of how community environments and policies** can make it easier for people to lead healthier lives and reduce their risks of chronic diseases.

Be there because you care about MOLALLA!

June 16th!

Molalla Library
Community Room

Presentation

5:30-6:00

Action Team Meeting

6:00-7:30
