automatic composite samplers, collect representative water samples, handling and cleaning laboratory glassware, calibrate and operate precision laboratory instruments.

6) Responds to system maintenance and/or emergency service calls outside of scheduled work hours while carrying a pager and working weekends on a rotational basis. In an emergency event or an officially declared State of Emergency, respond

as directed to ensure the restoration of essential public services, facilities and infrastructure.

7) Assists in researching situations and providing recommendations to the Wastewater Treatment Plant Manager. Assists in planning jobs, preparing material purchases, and working with outside vendors to conduct City Business. Creates, finds and updates work orders and purchase orders in City Systems as required to conduct and document City business under the direction of the Wastewater Treatment Plant Manager.

8) Inform and advise the Wastewater Treatment Plant Manager and other operators on facility operation matters, including making recommendations as requested. Under direction of the Wastewater Treatment Plant Manager, update Operation and Maintenance Manuals as necessary. Explain the purpose and operation of treatment facilities to citizens, school classes, and other water quality professionals. Make cost effective use of City resources.

9) Support a positive work environment. Treat other employees with respect. Work to resolve issues of conflicting personalities and needs.

10) Performs other related duties as required or directed.

Qualifications

REQUIRED

- High School diploma or equivalent plus additional specialized courses.
- Requires the use of biology, algebra, chemistry, laboratory technology and training generally applicable to wastewater treatment plants.
- State certification of Oregon Wastewater Treatment System Operator Grade II.
- Valid Oregon driver's license.

PREFERRED

- Associate of Science degree in Wastewater Treatment Technology, Oregon DEQ Wastewater Treatment System Operator Grade III.

Knowledge Required

- Theories and principals of wastewater treatment plant operations.
- Federal and state laws governing the National Pollution Discharge Elimination System.
- Personal computers and related software applications.

Skills Required

- Ability to apply theories of hydraulics and electricity to diagnose problems and make repairs.
- Ability to use tools to complete carpentry, plumbing, and mechanical projects.
- Ability to record operations and laboratory data and interpret process control trends.
- Ability to promote positive public relations and provide good customer service.
- Effectively communicate and interact cooperatively with coworkers, supervisors, contractors, and the general public to complete projects.

Work Environment

May be exposed to possible operations hazards including fumes, odors, toxic and caustic chemicals (such as chlorine gas and hydrochloric acid), heavy industrial machinery, high water and hydraulic pressure, hot and cold temperatures, slippery surfaces, water borne disease and infectious waste, and high voltage equipment requiring the use of safety devices and precautions. Possible exposure to explosive mixtures or toxic gas. Errors may be serious, involving such items as loss or delay of public services, equipment damage, downgrades in water quality or wastewater treatment quality and could affect public health. Accidental spills or leakage of hazardous chemicals could cause injury to employee and plant effluent problems which would be violations of DEQ regulations.
