Subject: Out of Season Discharge possible next week

Good Afternoon Mike,

Unfortunately record rainfalls have brought our lagoons to an average of 11-ft, and our Standard Operating Procedures require us to notify your office that mid-next week we will likely reach 12-ft and therefore be facing an out of season discharge of treated effluent to the Molalla River. The Effluent is expected to meet all parameters of the NPDES Permit as it would for any normal winter season day. I will keep you informed as the situation unfolds. Please give me a call if you have any questions.

Respectfully,

Andy Peters, Public Works Div Manager

Good Afternoon Mike,

Attached is the letter we discussed on Tuesday afternoon, bearing the facts as we understand them today around the temperature issues the Molalla STP is facing. Let me know if you have any questions or give me a call?

The City is also in receipt of your May 26th Warning Letter and will review.

Thanks Mike, Have a good week!

Respectfully,

Andy Peters, Public Works Div Manager

Attachments: 20220627 5 day Followup - Out of Season Discharge.pdf

Good Morning Mike, attached is the 5-day follow-up for the out-of-season discharge situation we faced, which ceased on June 22nd at 2pm. The hot weather is now drying the irrigation fields out rapidly, which is good news. Let me know if you have any questions. Have a great week!

Respectfully,
