Ah! That DMR is from 2020 when we first began using net DMR! I will look in to submitting correction.

Thanks!

Andy

**Subject:** RE: Molalla Temperature Data:

Mike, could we please get some more information from Aliana on her question? We are not seeing temperatures >100 degrees C indicated. From NetDMR: January shows 9.8 degree 7-day high and a 10.2 daily max; February 9.4 degree 7-day high and a 10.4 daily max; March had a 16.0 degree 7-day high and a 16.9 daily max.

Thanks,

Respectfully,

Andy,

See below.

Can you look at the actual and submitted data and reconcile? I hope the correct data is available.

**Subject:** Molalla Temperature Data:

Hi Mike,

I was doing some draft RPAs for the city of Molalla in anticipation of their permit renewal in 2023 and I noticed that in ICIS/NetDMR they reported some very, very high daily maximum and high 7 day average effluent temperatures for January, February, and March (in the 100s of degrees C). Given just how high the temperatures are and the fact that this is a domestic wastewater treatment plant I have a feeling that this may likely be a data entry error. Unless the permittee confirms and corrects the error I will need to use the officially reported data in the RPAs for permit renewal, which may result in the permittee getting a limit for analytes like pH and ammonia.

As the compliance inspector, would you be able to reach out to the permittee and confirm if this is a data error and have the permittee correct the issue in NetDMR?

Regards,  
Aliana

**Subject:** Touching base on extention request

Mike, just touching base: I'm sorry for the delay, I've been out on sick leave, but I should be able to get you this letter from the City addressing plant construction schedules we discussed by early next week if not sooner. I hope you are doing okay in thus heat wave, stay safe!

Respectfully,

Andy Peters
