

**Social Media Campaign:**  
**Fats Oils and Greases**

Is everything better with bacon? Not our sewers! When fats go down the drain, they end up clogging up our City's sewer pipes. That means more maintenance and more expensive sewer service for everyone.

Fats and oils belong in the trash. That bacon fat can be poured in a steel can, then thrown out after it's hardened. Do your part to keep our sewer system fat free!
